Nursing

Nursing offers a wide range of career opportunities-from entry-level practitioner to doctoral-level researcher. Nurses are hands-on health professionals who provide focused and highly personalized care. Nurses promote health, prevent disease and help patients cope with illness. Nurses advocate for their patients and patients’ families. They develop and manage nursing care plans and instruct patients and their families in proper care. As educators, they help whole communities by teaching individuals and groups how to take steps to improve or maintain their health.
